Bruges (BELGIUM)

## **DBS – STATE OF THE ART**

Several key opinion leaders will discuss the impressive therapeutic possibilities that deep brain stimulation offers for patients with movement disorders:

- Prof. dr. Fiorella Contarino  
(Haga hospital & University of Leiden, The Netherlands)
- Prof. dr. Todd Herrington  
(Massachusetts General Hospital & Harvard University, USA)
- Prof. dr. Marwan Hariz  
(University of Umeå, Sweden)

After their presentations, there will be ample opportunity to ask your questions about deep brain stimulation during a panel discussion moderated by Prof. dr. Patrick Santens, Ghent University Hospital.
